DETAILED ACTION

This final office action is in response to an amendment filed on January 29, 2003, and a 1. supplemental amendment, filed on April 3, 2003. Claims 18, 21 and 24 have been cancelled. Claims 1-6, 17, 19, 20, 22, 23, 25 and 29 are pending.

Response to Arguments

- 2. Examiner acknowledges corrections made to the specification and has withdrawn all prior objections.
- 3. The prior objection to claim 17 regarding the typographical error has also been withdrawn.
- 4. As for the rejections under 35 USC 102, Applicant states that Puram et al, hereinafter Puram, does not teach bilateral analysis where the skills of the contractor are matched to the needs of the employer while considering if the employer is a good match for the contractor. Examiner respectfully acknowledges that in the claims, it is still not clear how this bilateral analysis is being carried out. Even after amendments, Puram still reads on the claims. It is clearly stated in Puram that both the employers and candidates provide data regarding skill desired or skills possessed to be stored in a storage medium. Then the information gathered from employers and candidates is processed and the candidates are ranked based on how their qualifications suit the needs of the employer and a list is provided to the employer. This is consistent with the claim language in this application, as well as the broadest reasonable interpretation given by the examiner. Both the party and counterparty reveal preferences, a profile for each is set up, then the profile s are analyzed to derive a list of counterparties who

Application/Control Number: 09/538,556 Page 3

Art Unit: 3623

provide a close fit and the list is communicated to the party. In the rejection the party is equated to an employer and the counterparty is equated to a candidate.

- 5. As for the amendment to the claims to include "at least one of the party and a party co-evaluator" and "from at least one of the counterparty and a counterparty co-evaluator", this can be interpreted as obtaining responses from *either* the party or the party co-evaluator or from *either* the counterparty or counterparty co-evaluator. Therefore, Puram still reads on claims.
- 6. As for the amendments to the claims wherein deriving a list of counterparties "for which the preferences of the party closely match the preferences of the counterparty and the preferences of the counterparty closely match the preferences of the party", the Puram reference teaches considering the preference data from both the candidate and matching it to preference data from the employer. Puram also teaches matching preference data of the employer to find a candidate to fill the position. The candidate lists their skills that are matched with the needs of the employers. Then the employers list preferences such as hiring criteria, which is then matched with information given by the candidate (column 7, lines 4-21).
- 7. The prior rejections are maintained and repeated below with additional details due to amendments to the claims.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who

has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

9. Claims 1, 3, 5-13, 16, 17, 19, 22, 23, and 25-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Puram et al, U.S. Patent No. 6,289,340 B1.

As per claim 1, Puram et al teaches a method for facilitating evaluation comprising: obtaining for each of the parties (employers) in the first class and storing in a first digital storage medium responses from at least one of the party and a party co-evaluator to a first set of questions intended to reveal party preferences that can be used to estimate the closeness of such party's fit with a counterparty (candidates) in such context and obtaining for each of the counterparties in the second class and storing in a second digital storage medium responses from at least one of the counterparty and a counterparty co-evaluator to a second set of questions intended to reveal counterparty preferences that can be used to estimate the closeness of such counterparty's fit with a party in such context (column 2, lines 44-55, column 3, lines 53-56; in this reference the "employers" and "candidates" provide data regarding the skills desired or possessed and that information is stored within a storage medium), deriving from the responses to the first set of questions for each such party a first preference profile for each such party and deriving from the responses to the second set of questions for each such counterparty a second preference profile for each such counterparty (column 1, lines 10-13; profiles are generated and

Application/Control Number: 09/538,556

Art Unit: 3623

stored for candidates and positions to be filled (employer profile)), and in a separate computer process, analyzing the preference profiles of the party and counterparty to generate a list of counterparties for which the preferences of the party closely match the preferences of the counterparty and the preferences of the counterparty closely match the preferences of the party and communicating the first list to such party (column 7, lines 6-22, 65-67).

As per claim 3, Puram et al teaches the first list ranked according to the closeness of fit (abstract; the candidates are ranked according to adjusted skills scores to yield best-fit matches).

As per claims 5 and 6, Puram et al teaches obtaining responses from each of the parties and counterparties is accomplished using communication over a communication network (column 3, lines 7-8).

As per claims 7 and 8, Puram et al teaches obtaining responses from each of the parties and counterparties includes making web pages available providing the questions and permitting entry by such party or counterparty of responses thereto (column 3, lines 50-58, column 5, lines 60-67).

As per claim 9, Puram et al teaches questions eliciting revelation of a utility value which indicates the value that the party places on the level of the attribute (column 5, lines 60-65; the party (employer identifies the skills desired and indicates the priority of that skill).

As per claim 10, Puram et al teaches questions eliciting revelation of a utility value which indicates the value that the counterparty places on the level of the attribute (column 5, lines 36-42; the counterparty (candidate) indicates priority of preferred geographic region of employment or willingness to travel).

As per claim 11, Puram et al teaches analyzing the preference profile of the party in relation to the preference profiles of the counterparties using a measure of distance between a set of utility values created with respect to the first series of attributes and a set of utility values created for the second series of attributes (column 7, lines 6-13, 21-25, 51-69; the search only returns those candidates whose skills profiles matches or exceeds the specified criteria).

As per claim 12, Puram et al teaches a set of questions requiring the party to rank each of a non-null set of items from among a plurality of possible ranks (column 2, lines 44-49; the employer provides data regarding the skills desired and the priority of that skill for the position).

As per claim 13, Puram et al teaches a set of questions requiring the counterparty to rank each of a non-null set of items from among a plurality of possible ranks (column 5, lines 36-42; the counterparty (candidate) inputs preference data, for example, the candidate inputs his or her preferred geographic location).

As per claim 16, Puram et al teaches the preference profile of each party associates a utility value to indicate the value which the party places on the level of the attribute (column 5, lines 60-67, column 2, lines 44-50; the party (employer) identifies the importance or priority of the skills desired as part of the preference data that is gathered and stored in the profile).

As per claim 17, Puram et al teaches the preference profile of each counterparty associates a utility value to indicate the value which the counterparty places on each level of the attribute (column 5, lines 35-42, column 2, lines 50-55; the counterparty (candidate) indicates preference values for each attribute which are stored in the profile).

As per claim 19, Puram et al teaches a party co-evaluator is an associate of the party (Puram teaches a third party evaluation of the candidate (column 3, lines 20-25), inherently this

evaluation would come from an associate or someone who knows the candidate, otherwise, the third party evaluation would not be accurate)

As per claim 22, the same rejection as applied to claim 1 above is applied to claim 22.

Claim 22 is the computer process for implementing the steps of claim 1.

As per claim 23, the same rejection as applied to claim 1 above is applied to claim 23.

Claim 23 is a question and response module for obtaining the information claimed in claim 1.

Puram et al teaches separate interfaces for collecting the profile information (column 3, lines 20-25), and also teaches storing the information in separate storage media (column 2, lines 44-55).

As per claim 25, the same rejection as applied to claim 1 above is applied to claim 25. In claim 25, the database is structured for storing the information obtained in claim 1. Puram et al teaches separate databases for the profile information gathered from the party (employer) and the counterparty (candidate).

As per claim 26, the same rejection as applied to claim 16 above is applied to claim 26. In claim 26, the information obtained in claim 16 is stored in the database of claim 25.

As per claim 27, the same rejection as applied to claim 17 above is applied to claim 27. In claim 27, the information obtained in claim 17 is stored in the database of claim 25.

As per claim 28, the same rejection as applied to claim 11 above is applied to claim 28.

As per claim 29, the same rejection is applied to claims 1 and 23 above as applied to claim 29. In claim 29, the database is structured for storing the information obtained in claim 1 by the question and response module in claim 23.

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 11. Claims 2, 4, 14, 15 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Puram et al, U.S. Patent No. 6,289,340 B1 and CareerMosaic. The following rejections are based on CareerMosaic.com. Applicant is reminded that the following rejections are based on the product of CareerMosaic.com

CareerMosaic.com web pages 1-16 were retrieved from the "Wayback Machine" (web.archive.org). The CareerMosaic.com web pages referenced were archived on April 12, 1997.

As per claim 2, Puram et al teaches communicating, to a party (employer), a list of counterparties (candidates) whose preference profiles closely fit with those of the parties but does not teach communicating, to a counterparty, a list of parties for which the preferences of the party closely match the preferences of the counterparty and the preferences of the counterparty closely match the preferences of the party. CareerMosaic.com offers a way for counterparties to receive a list of parties with whom their preferences match (pg 5 – a description of the CareerMosaic J.O.B.S. database, where the counterparty enters criteria important to the job search and the second list of companies (parties) that match are returned. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the invention of Puram et al to include the list presented to the counterparty as well. The motivation for doing so

would be so that both the employer and candidate could make a more informed decision. For example if the counterparty was not presented with a list of matching parties, he or she may be inclined to take the first offer for a job. Whereas, is the counterparty knew of the parties who might be contacting them, they could make a better decision on whether to take their first offer.

As per claim 4, Puram et al teaches the second list ranked according to the closeness of fit (abstract; the candidates are ranked according to adjusted skills scores to yield best-fit matches). Puram et al does not teach a ranked list of parties. It is old and well known in the art to rank lists to group more relevant results together. It would have been obvious to one of ordinary skill in the art at the time of the invention to generate a ranked list of matching parties as well, so both the employers and candidates could make a well-informed decision on filling and selecting a position. A real world example would be that a candidate who receives more than one offer for employment and/or interview would choose the potential employer that best appeals to the candidate. It is for this reason one would be motivated to generate a ranked list of matching parties.

As per claim 14, Puram et al teaches all the limitations of claim 14, as applied to claim 9 above, but does not teach the questions revealing values without explicitly asking for the values. Puram et al teaches the party assigning a desired skill level for skills such as operating systems, languages, project experience, etc. (column 6, lines 11-14). By assigning a desired skill level to those skills, it would be obvious to one of ordinary skill in the art at the time of the invention to imply that one without those skills (or one with other skills) are not needed for the position. The motivation of using this type of question is to help the counterparty to realize what type of

person is being sought after for the job. If the counterparty does not have the skills given the

most priority, they would know they are not qualified.

As per claim 15, Puram et al teaches all the limitations of claim 15, as applied to claim 10 above, but does not teach the questions revealing values without explicitly asking for the values. Puram et al teaches the counterparty identifying their geographic location preference (column 5, lines 35-42). It would be obvious to one of ordinary skill in the art at the time of the invention to imply from that question whether or not the counterparty is willing to relocate. For example, if the candidate was living in one state and their geographic preference was in another state, the party could imply that the counterparty is willing to relocate. The motivation of using this type of question is to help the party to find a counterparty to is available for a position in a certain geographic region and if that counterparty is willing to relocate from their current location. If the position is in a state that the counterparty is not willing to relocate to, the party would not contact that counterparty.

As per claim 20, Puram et al does not explicitly teach the counterparty co-evaluator is one of an associate, a member of a group to which the counterparty belongs, a parent or guardian of the counterparty, an advisor to the counterparty, a relative of the counterparty, and a friend of the counterparty. It would be inherent that there would be a counterparty co-evaluator involved in any business transaction such as hiring a candidate (as in the Puram reference). It is well known in general hiring practices to involve more than one person in the hiring process. A hiring manager may set forth skills needed for the job and have them reviewed by another person in the group such as his or her manager or the person for which the candidate will be working.

This type of practice ensures that the list of skills needed includes everything relevant to the job opening.

Conclusion

12. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Johnna Stimpak** whose telephone number is **703-305-4566**. The examiner can normally be reached Monday through Friday from 8:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Tariq Hafiz**, can be reached on **703-305-9643**.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the **Receptionist** whose telephone number is **703-308-1113**.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

Or faxed to:

703-305-7687

[Official communications; including

After Final communications labeled

"Box AF"]

703-746-3956

[Informal/Draft communications, labeled

"PROPOSED" or "DRAFT"]

Hand delivered responses should be brought to Crystal Park 5, 2451 Crystal Drive, Arlington, VA, 7th Floor.
